New children's campus in the centre of the municipality of Sulz

The use of board formwork made from rough-sawn boards gives the rooms a natural and warm atmosphere. The centrepiece of the building is formed by the four childcare rooms, which are individually designed and tailored to the needs of the children. A specially equipped exercise room provides additional space for physical activities and promotes the children's motor development. A particular highlight of the project is the slide integrated into the stairwell, which provides an exciting and playful connection between the floors for the children. This innovative solution contributes to the enjoyment and enthusiasm of the young users and makes everyday life in the care centre an unforgettable experience
