

Interspar Floridsdorf

Data and facts

Company	Prajo & Co GmbH
Type	Demolition
Runtime	02.2015 - 07.2015
Principal	SES Spar European Shopping Centers

[Project report online](#)

www.porr-group.com

New room for the centre of Floridsdorf.

On top of that, the foundation slab, the outer walls and a part of the basement floor's ceiling as well as the reinforced concrete walling of the sprinkler basins had to be preserved since the new building was to be erected on top of the foundation slab and the walls of the basement floor. The outer walls were protected by means of a reinforced concrete construction purposefully designed by Prajo & Co. All materials were disposed of in full accordance with the waste industry code.

In October 2015, demolition work ended successfully and the new building site in the centre of Floridsdorf could be handed over to the client.

Impressions

Image notes

1

Demolition Interspar Floridsdorf.

Demolishing the seven-storey building created room for a new building in the centre of Vienna's Floridsdorf district.

2

Demolition Interspar Floridsdorf.

Restricted space in the middle of the busy Viennese district turned demolition work into a real challenge.
