Industrial construction and eye-catcher.

PORR's services included all master builder work, from excavation work to reinforced concrete construction to façade construction, the installation of the expanded metal envelope and finishing crafts all the way to the heating, air conditioning, ventilation and electrical equipment. The majority of carcass work needed to be completed in a mere ten months in 2006. More than 33,000m³ of reinforced concrete and 3,300t of reinforcing steel were installed in the process. The finishing crafts, the outside facilities, roads and façades, were mostly completed in 2007.

Impressions

Image notes

1

Pfaffenau Waste Incineration Plant.

Orange expanded metal characterises the new waste incineration plant's exterior facade.

2

Pfaffenau Waste Incineration Plant.

Even the structure's back looks quite striking.
