PROJECT REPORT

Reisseck II Pumped Storage Power Plant

Data and facts

Company	PORR Bau GmbH
Type	Tunneling, Power plant construction and plant engineering
Runtime	06.2010 - 09.2014
Principal	Verbund Hydro Power

Project report online

www.porr.at

Power plant construction at a 42° gradient.

The spectacular construction site attracted numerous sightseers and so the flows of visitors through the construction site also had to be organised.

Today the new, approx. 5km-long headrace consists of a 3.3km-long headrace gallery, a 0.8km-long pressure shaft, a 0.6km-long flat section and a 0.3km upstream distribution pipeline, via which the water flows into the new hydropower cavern.
