Historic architectural gem shines in new splendour.

Generally speaking, the wings included in the project, due to the bad condition of the existing foundations which were affected by dry rot and partially insufficient wall strength, were all in need of foundation rehabilitation and wall grouting work. Despite these challenges, the generally rehabilitated wings as well as the underground car park and the newly constructed central risalit could be handed over on schedule. Thus, the Army Surveying and Construction Department can now use new office premises constructed at highest standards located in a listed building.

Impressions

Image notes

1

Rossauer Kaserne.

A central risalit had to be reconstructed in the course of the general rehabilitation project.

2

Rossauer Kaserne.

A ventilation system was installed in the newly constructed underground car park.

3

Rossauer Kaserne.

The ventilation system of the newly constructed underground car park.
