PORR

Comprehensive construction of Building D at St. Pölten University Hospital

The project was commissioned by VITALIS Grundstücksverwaltung GmbH and NÖ Landeskliniken-Holding. It was carried out by the St. Pölten University Hospital consortium, comprising VAMED Standortentwicklung und Engineering GmbH and PORR Bau GmbH.

The scope of work included complete project management, the planning, construction and fitting-out of the building, including the supply and installation of medical technology, as well as relocation, training and commissioning.

The new House D offers state-of-the-art hospital infrastructure across 11 floors with a gross floor area of around 61,400 m². It comprises 11 operating theatres, around 400 beds for various medical specialities, and a central outpatient clinic. This makes it the largest hospital construction project in Lower Austria. A flagship project that represents a key component for clinical care, teaching and research. The project ran from May 2017 to May 2024.
