PORR

Safely landfilled

Another field of application of the waste treatment plant is the conditioning of wastes with high heat values which can be used in a thermal waste treatment system after being treated.

Thus PORR's stabilising system makes an important contribution to the protection of our environment.

Impressions

Image notes

1

Stabilising plant

PORR's system processes wastes in such a way that they can be landfilled in a safe way.

2

Stabilising plant

Before residual materials can be deposited, they must be stabilised to meet the requirements of the Landfill Act.
